

# Employment Opportunity

The National Gas Company of Trinidad and Tobago Limited

The National Gas Company of Trinidad and Tobago Limited (NGC), a leading Company in the development of the country's natural gas industry, invites applications from suitably qualified nationals to join our dynamic team of professionals to work in a challenging results-oriented environment in the following position:

## PROJECT MANAGER, NATURAL GAS STORAGE

The Project Manager, Natural Gas Storage is primarily responsible for managing all aspects of the natural gas storage project. This includes, but is not limited to, all activities and requirements for the purpose of reducing the impact of short term natural gas supply-demand imbalances. The Project Manager (PM) will develop a plan for, facilitate and supervise the daily progress of the project. The ability to work with a multidisciplinary team is critical to ensure on-time and within budget delivery of all project outcomes. You will also be a strong relationship manager having to work closely with regulatory bodies, suppliers and vendors to ensure that all statutory and contractual obligations are met as agreed to and to mitigate any risks identified that may delay the on-time completion of the project.

### Minimum Qualifications:

- A first degree in Petroleum Engineering, Reservoir Engineering, Petroleum Geoscience, Petroleum Geology or any other related discipline
- Registered Professional Engineer
- Professional Certificate in Project Management

### Minimum Experience:

- Ten (10) years Engineering experience
- Five (5) years Engineering experience in oil/gas production or in a reservoir related field
- Proven experience as a Project Manager with the ability to identify risks and proactively plan for their mitigation
- Contract Management, preferable on major projects
- Able to use technology for analysis, research, reporting and presenting

You are expected to be mature, trustworthy, facilitative, an effective manager and able to recognize, motivate and develop talent. Proven ability to lead a multi-disciplinary and diverse team is highly sought. To be successful, you are required to be innovative, an experienced negotiator, effective communicator and contract administrator able to work in a fast-paced and multi-disciplinary environment and who practices effective stakeholder management.

**Kindly submit your applications through [CaribbeanJobs.com](http://CaribbeanJobs.com) by Monday 29th December, 2014. Please include the following:**

1. An updated resume, stating clearly in reverse chronological order, your experience, qualifications and suitability, as outlined above. Your resume should include all other standard information, including the name and contact information of three (3) persons who we may contact for references.
2. A cover letter, addressed to the Vice President, Gas Transmission and Distribution, clearly summarizing why you may be the most suitable candidate for this role.
3. Answers to the two (2) questions posed below:
  - a. What is the largest project that you have successfully managed in your career thus far? Include information on budget, resources (including human resources), timelines, key stakeholders, etc.
  - b. Identify one (1) key risk that you were required to manage closely to ensure that the project was delivered successfully.

**NGC offers a competitive compensation package inclusive of Housing Allowance and Group Life Medical Coverage.**
