

Keeping the Home Safe

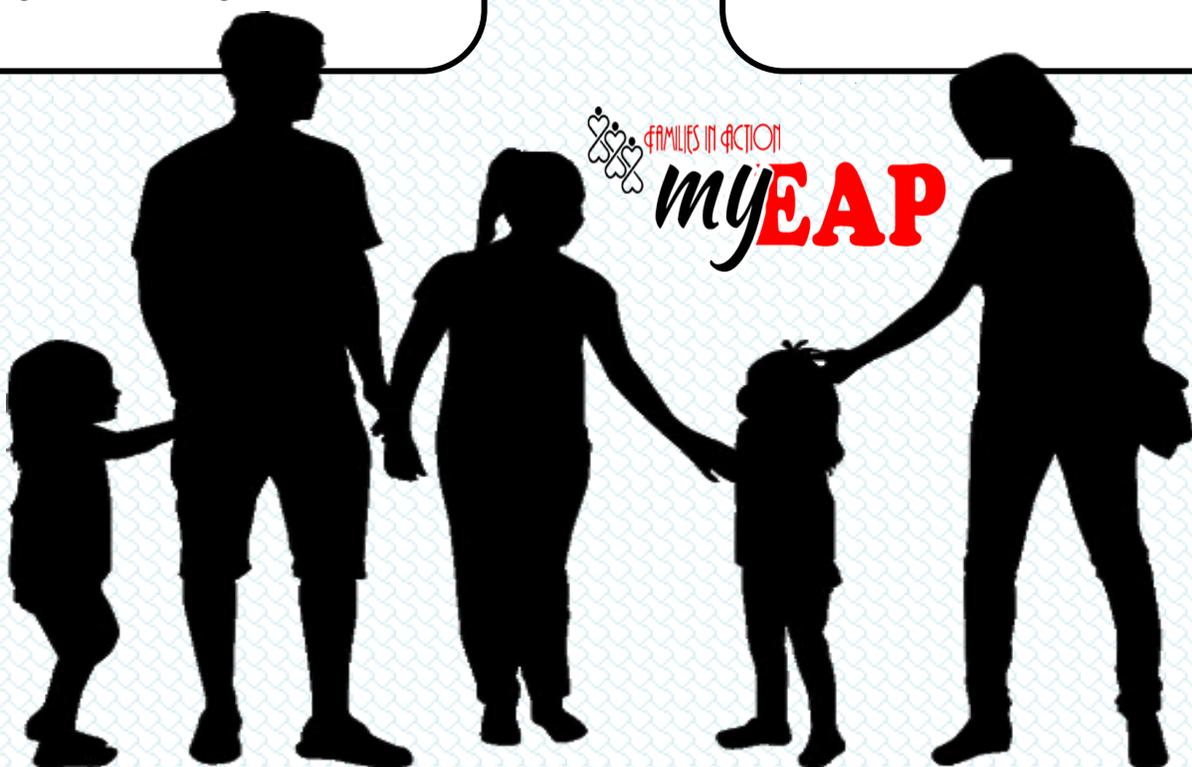

Encourage your Family Members to...

ALL HOUSEHOLDS

- *Clean hands at the door and at regular intervals*
- *Create habits and reminders to avoid touching their face and cover coughs and sneezes*
- *Disinfect surfaces like doorknobs, tables, and handrails regularly*
- *Increase ventilation by opening windows or adjusting air conditioning*

HOUSEHOLDS WITH SICK FAMILY MEMBERS

- *Give sick members their own room if possible, and keep the door closed*
- *Have only one family member care for them*
- *Consider providing additional protections or more intensive care for household members over 65 years old or with underlying conditions*

HOUSEHOLDS WITH VULNERABLE SENIORS OR THOSE WITH SIGNIFICANT UNDERLYING CONDITIONS

Significant underlying conditions include heart, lung, kidney disease; diabetes; and conditions that suppress the immune system

- *Have the healthy people in the household conduct themselves as if they were a significant risk to the person with the underlying conditions. For example, wash hands frequently before interacting with the person, such as by feeding or caring for the person*
- *If possible, provide a protected space for vulnerable household members*
- *Ensure all utensils and surfaces are cleaned regularly*
