COVID-19 Patients in Step-down/ Transition Facilities

Sangre Grande Centre (Brooklyn Facility) - 25
All are low risk, stable patients.

- Intensive Care Units (ICUs) are hospital units that provide treatment for people who are critically ill. They are staffed with health care professionals who are trained in ICU treatment and the use of sophisticated monitoring equipment.
- High Dependency Units (HDUs) are hospital units for people who are very ill and need more observation, treatment and nursing care than is possible in a general ward but less than that given in an Intensive Care Unit.
- An Ambulatory Patient is able to walk about and is not bedridden.

The map below provides the epidemiological mapping of laboratory confirmed positive COVID-19 patients in Trinidad and Tobago as at 10 April 2020.
