COVID-19 Patients in Step-down/ Transition Facilities

| |
|---|
| Sangre Grande Centre (Brooklyn Facility) - 16 <ul style="list-style-type: none">• All are low risk, stable patients. |
| Home of Football, Couva – 22 <ul style="list-style-type: none">• All are low risk, stable patients |

Intensive Care Units (ICUs) are hospital wards that provide treatment for people who are very ill. They are staffed with health care professionals who are trained in ICU treatment and the use of sophisticated monitoring equipment.

High Dependency Units (HDUs) are wards for people who need more observation, treatment and nursing care than is possible in a general ward but slightly less than that given in an Intensive Care Unit.

An Ambulatory Patient is able to walk about and is not bedridden.
