Trinidad and Tobago COVID-19 (Novel Coronavirus) Update # 394

Port-of-Spain, August 13th 2020: As part of the national drive to safeguard the health of the Trinidad and Tobago population in the face of the global COVID-19 outbreak, the Ministry of Health continues to provide up-to-date information on the country's status in this regard.

The Ministry of Health reminds the population to source your information only from official sources, such as the Ministry of Health or Ministry of Communications.

The Ministry of Health provides the following clinical update as of the **morning of Thursday 13th August, 2020:**

Number of samples submitted to the Caribbean Public Health Agency (CARPHA) and UWI site for testing for COVID-19	12,315
Number of unique patient tests completed	10,695
Number of repeated tests	1,620
Number of samples which have tested positive at public and private facilities in Trinidad and Tobago	369
Total number of active cases	222
Number of deaths	8
Number of persons discharged	139

The forty-three (43) positive cases reported below show results from samples taken during the period August 5th, 2020 to present. Therefore, this figure is NOT representative of the positive cases over the last 24 hours only.

The Ministry of Health provides the following update:

- Forty-three (43) additional persons have tested positive for COVID -19.
 - One (1) person tested positive at a private lab
 - Twenty-three (23) cases are pending epidemiological investigation.
 - Nineteen (19) are contacts of recently positive COVID-19 patients. All established protocols have been implemented.

COVID-19 Positive Patients in Hospital – (144). Fifteen (15) patients are en route/ being admitted to hospital. Forty three (43) new patients will be processed for admission.

Couva Hospital and Multi-Training Facility	95 1 (ICU) 2 (HDU)
Caura Hospital	49

COVID-19 Positive Patients in Step-down / Transition Facilities – (20) – Brooklyn Facility, Sangre Grande

Intensive Care Units (ICUs) are hospital wards that provide treatment for people who are very ill. They are staffed with health care professionals who are trained in ICU treatment and the use of sophisticated monitoring equipment.

High Dependency Units (HDUs) are wards for people who need more observation, treatment and nursing care than is possible in a general ward but slightly less than that given in an Intensive Care Unit.

An Ambulatory Patient is able to walk about and is not bedridden.

If you or a loved one develops symptoms of COVID-19, please call the hotline 877-WELL or 800-WELL (9355) for further guidance. If the person is severely ill, call the 811 (emergency hotline) or call ahead to the Accident and Emergency Department of your nearest hospital for help and go in immediately.

The Government of Trinidad and Tobago will continue to update the public via its official communication channels such as the Ministry of Health’s website (health.gov.tt), the Ministry of Communications Websites (moc.gov.tt and news.gov.tt) and the relevant social media pages of these entities (Facebook, Twitter and Instagram).
