

SUSTAINABILITY REPORT 2021: AT A GLANCE

**We have articulated the following targets in support of Trinidad and Tobago's Paris Agreement commitments:**

- By 2030, to attain **30%** of Trinidad and Tobago's market share for renewable energy and energy efficiency business
- By 2030, to achieve a **75%** reduction in venting of methane, and **50%** reduction of fugitive methane emissions
- By 2030, to achieve **2%** of Trinidad and Tobago's Nationally Determined Contributions (NDCs) target for greenhouse gas (GHG) reduction
- By 2040, to achieve **30%** of Trinidad and Tobago's NDCs target for GHG reduction
- By 2050, to **achieve carbon neutrality** across The NGC Group

# OUR GREEN AGENDA

**We are committed to greening our business.**

We set a target of **10%** reduction in energy consumption from 2019 levels by 2022. We also aim to achieve an overall **reduction of 75%** in venting methane emissions and **50%** in fugitive methane, as well as a **50% reduction** in overall GHG emissions by 2025, compared to 2021.

**We have already made important contributions to national emissions reduction.**

Trees planted during our reforestation programme have sequestered more than **27,000 tonnes** of CO<sub>2</sub> as at 2021. Meanwhile, over **44,000 tonnes** of CO<sub>2</sub> emissions have been avoided thanks to CNG since 2014.

**We joined the global Oil and Gas Methane Partnership (OGMP),** whose members voluntarily commit to reporting and reducing methane emissions in the oil and gas sector.

**We are partnering on green energy projects.**

Together with the Trinidad and Tobago Solid Waste Management Company Limited (SWMCOL), we are exploring opportunities to put landfill gas to productive use. We are also working with Kenesjay Green Limited (KGL) on the creation of a sustainable hydrogen economy.

**We are educating our people about clean energy.**

We launched a new website called CariGreen, to serve as a central repository for investor, academic and citizen research into clean energy in the Caribbean. This follows our consumer app Energy SmartTT, launched in 2020 to help citizens learn about energy efficiency.
