Currency: Trinidad and Tobago dollar (TTD)

Centre of natural gas industry: Point Lisas Industrial Estate

Petrochemical plants: Point Lisas Industrial Estate

LNG Plant: Point Fortin

Business and Investment Legislation

The petroleum industry in Trinidad and Tobago is principally governed by the Petroleum Act (1969), the Petroleum Regulations (1970) made thereunder and the Petroleum Taxes Act (1974).

The Petroleum Act establishes a framework for the grant of licenses and contracts of petroleum operations which include activity on land and in areas underlying the country's territorial waters. Under the Act, the Minister of Energy and Energy Industries is responsible for determining the areas to be made available for petroleum operations. The Minister may also invite applications for the rights to explore for and produce petroleum from these areas by means of competitive bidding.

Persons wishing to engage in petroleum exploration and production operations must apply to the Minister of Energy and Energy Industries who may issue the following types of licenses and contracts:

- An Exploration (Public Petroleum Right) license which grants the licensee the non-exclusive right to carry out the petroleum operations provided by the license
- An Exploration and Production (Public Petroleum Right) license which grants the licensee the exclusive right to explore for, produce and dispose of petroleum in accordance with the terms of the license
- An Exploration and Production (Private Petroleum Right) license
- A Production Sharing Contract for the conduct of petroleum operations relating to the operations relating to the exploration, production and disposal of petroleum within prescribed areas

On the basis of the Petroleum Act and its subsidiary regulations, the Ministry of Energy and Energy Industries regulates and gives broad direction and guidance to the petroleum industry.

Company profile

NGC is an integrated energy company operating across the energy value chain, focusing on sustainability and pursuing an energy transition model through its Green Agenda. NGC leads a diversified, globalising conglomerate of over 30 companies, which support its mission to create exceptional value from natural gas and related energy businesses through its people and strategic partnerships.

While NGC's core business was the aggregation, purchase, sale, transportation, and distribution of natural gas in Trinidad and Tobago, other developing and focus areas of business include natural gas processing and marketing of natural gas liquids; (non-operated) joint venture oil production; marketing and trading of energy commodities; portfolio investments; technical services; engineering and activities in the sustainable energy space, including renewable energy and energy efficiency projects and investments; development and management of industrial site, port and marine infrastructure; and marketing and sale of Compressed Natural Gas (CNG).

NGC's Main Subsidiaries Include:

- National Energy Corporation of Trinidad and Tobago Limited (National Energy)
- Phoenia Park Gas Processors Limited (PPGPL)
- NGC CNG Company Limited (NGC CNG)
- La Brea Industrial Development Company Limited (LABIDCO)
- Trinidad and Tobago NGL Limited (TTNGL)

A valued player in our nation's natural gas-based energy sector, NGC, and by extension, The NGC Group of Companies, has a proven business model for maximising resources: a model with applicability far beyond the shores of Trinidad and Tobago.
