

A MODEL FOR SUCCESS

BEACHFIELD SLUG CATCHER FACILITY AT GUAYAGUAYARE,
TRINIDAD & TOBAGO

When it comes to maximising your nation's natural gas potential, forging the vital link between upstream and downstream operators and generating consistent national wealth and development, there's no need to reinvent the process. The National Gas Company of Trinidad and Tobago (NGC) has successfully crafted a globally-recognised model for gas-based energy sector development, including investment in key sectors of the local gas value chain. Trinidad and Tobago has exploded onto the world stage as a major exporter of ammonia, methanol, DRI and LNG. NGC has constructed a 56" diameter Cross Island Pipeline (CIP), the first pipeline of this size in the Western Hemisphere.

Boasting an asset base valued at over US\$6 billion, not only does NGC construct, operate and maintain pipeline networks and gas inlet facilities, we also compress, transmit, distribute and sell natural gas to energy industries and commercial concerns. In addition, we provide world-class industrial facility management and marketing services. With year-on-year gas sector growth averaging 5 percent for more than a decade, the Trinidad Gas Model is a success.

NGC can do it for you.
