

**THE NATIONAL GAS COMPANY
OF TRINIDAD AND TOBAGO LIMITED**

A first for NGC, a windfall for T&T.

On August 17th, NGC made a bold step into the arena of Liquefied Natural Gas (LNG) marketing—a first for a wholly state-owned company. Previously, LNG volumes from NGC’s interest in Train 4 were solely marketed by a third party.

Not anymore.

After a global tendering process, NGC sold the cargo to a major hydrocarbon trading company with offices in Singapore and Geneva. The LNG volume of approximately 118,000 cubic meters was loaded onto the LNG carrier *Gallina*.

Our venture with this cargo has brought significant revenue to the country. NGC’s President, Indar Maharaj, described the historic sale as “another step in our transformation process” as it opens the way for NGC to become a major player in the global LNG trading market and aligns with our Mission to “create exceptional national value from natural gas and energy businesses”.

It also coincides with our 37th Anniversary, which makes this special event all the more extraordinary.
